### **DETAILED ACTION**

Applicant amended **Claim 17** via Examiner's Amendment, *infra*. **Claims 1-17** are pending and ALLOWED.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on January 31, 2005 was correctly filed. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the IDS was considered by the Examiner. Please refer to Applicant's copy of PTO-1449, submitted herewith.

#### ***Response to Restriction Requirement***

Applicant's election with traverse of Group I in the reply filed on October 5, 2006 is acknowledged. Applicant's arguments as to the validity of the restriction are persuasive; the restriction requirement is withdrawn. Group II is rejoined. Group I was found to be free of the prior art.

#### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Art Unit: 1626

Authorization for this examiner's amendment was given in a telephone interview with Stefan Koschmieder on December 20, 2006.

The application has been amended as follows:

- **Claim 17: Delete** all text and **insert** the following text:

“A process of claim 1, wherein formula (III) is 4-[5-(4-pentyloxyphenyl)isoxazol-3-yl]benzoic acid.

***Reasons for Allowance***

Applicant's invention is drawn to a process of preparing compounds of the formulae (I), (II), (III), and (IV). No prior art anticipates or renders Applicant's instantly claimed process obvious.

The closest prior art is disclosed in WIPO Publication No. WO 96/11210, published April 11, 1996. The '210 publication discloses a process of preparing 4-[5-(4-pentyloxyphenyl)isoxazol-3-yl]. However, the process disclosed in the '210 publication does not take the same approach as the instantly claimed compounds. Unlike the process disclosed in the '210 publication, the instantly claimed process solves the problem of isolating the by-product formed, 5-(4-pentyloxyphenyl)-3-[4-[5-(4-pentyloxyphenyl)isoxazol-3-yl]phenyl]isoxazole.

Therefore, because there is no art which anticipates or renders obvious Applicant's invention, **Claims 1-17** are ALLOWED.
